

Diversity Data 2019

The following pages contain the anonymised Diversity Data required to be collected and published by Radcliffe Chambers' Diversity Data Officer under the rules as set out by The Bar Standards. Surveys are conducted every three years.

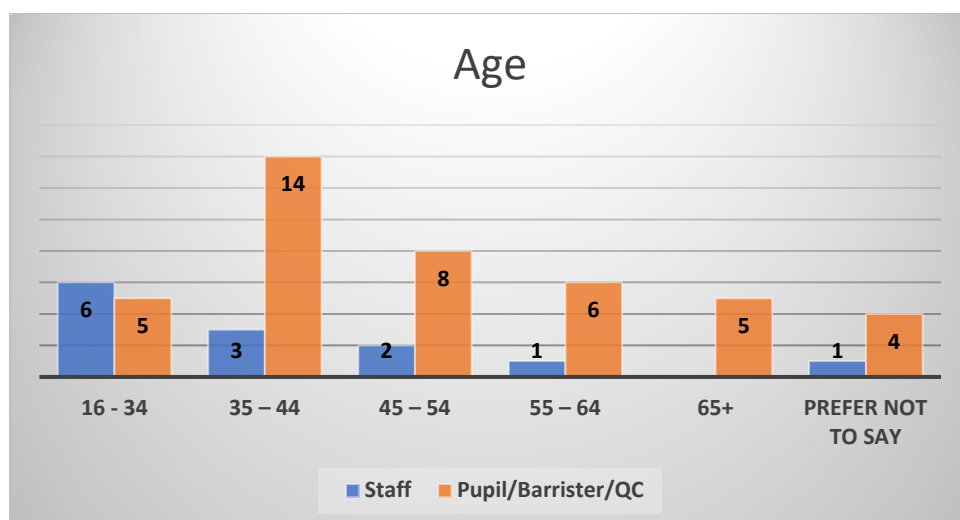

The results are based on the number of voluntary responses received, which in each question, are lower than the actual number of QCs, Barristers, Pupils and staff at these Chambers. Data is not published where its publication might identify individuals without their consent.
